CONTENTS

Preface 1

Opening Address 3
M. Namiki

Opening Address 5
C. Koyama

I. *Chaos, Irreversibility and Non-linear Dynamics*

From Classical Chaos to Quantum Chaos 7
I. Prigogine

Quantum Chaos 27
G. Casati

Order and Chaos in Quantum Irregular Scattering: Wigner's Time Delay 43
B. Eckhardt

Scale Invariant Growth in Non-Linear Systems 57
K. Kawasaki

Quantum Groups and Dynamical Systems 67
P. P. Kulish

Phase Retrieval Problem in Quantum Chaos 77
M. Toda

Chaos in the Fundamental Forces? 81
H. B. Nielsen and S. E. Rugh

Generation of the Primordial Density Fluctuations from Interactions 87
M. Morikawa

Nonequilibrium Thermo Field Dynamics – in Time Representation 93
Y. Yamanaka

A Unified Framework of Stochastic Differential Equations for Quantum Systems 99
T. Arimitsu and T. Saito

In Search for Invariant Measures of Chaos in General Relativity 103
M. Biesiada and M. Szydlowski

Convective Motion in Space and Time: Defect Mediated Localized Traveling Waves 107
Y. Harada, Y. Masuno and K. Sugihara

Gauge Theory of Quantum Groups 111
M. Hirayama

Avoided Crossing and Bifurcation: Numerical Experiments of a Billiard 115
H. Hirooka

Soliton-Gas Picture for Quantum Irregular Spectra 119
H. Ishio

Order-to-Chaos Transition in Yang–Mills–Higgs Theory with Monopole Solution 123
T. Kawabe

Chaos beyond the Standard Model? 127
G. Mandelbaum

Eigenvalue Correlations for Random Matrices 133
T. Nagao

New Concepts in Ergodic Theory 137
N. Saitô

Complex Classical Path and Tunneling in Coherent State Path Integral 141
M. Sakagami

A Generalized Langevin Equation Satisfied by Wave Function: A Theory of Damping for Molecular Processes and Stochastic Process of Wave Function 145
K. Someda and R. D. Levine

Two-Loop (β^6) S-Matrix for $A_1^{(1)}$ Affine Toda Field Theory 149
F. P. Zen

How to Generalize the Lapunov Exponent for Quantum Mechanics 153
K. Życzkowski, H. Wiedemann and W. Słomczynski

II. *Quantum Mechanics and Measurement Theory*

State Selection and Spectral Modelling in Neutron Interferometry 157
H. Rauch

Quantum Measurements of Trapped Ions 169
W. M. Itano, J. C. Bergquist, J. J. Bollinger, J. M. Gilligan, D. J. Heinzen, F. L. Moore, M. G. Raizen and D. J. Wineland

Environment-Induced Decoherence and the Transition from Quantum to Classical 185
W. H. Zurek

Continuous Quantum Measurements and Geometry of the Universe 197
M. B. Mensky

Coherence vs Decoherence: Comparing Alternative Approaches 211
S. Pascazio

Quantum Physics for Correlated Photons 217
A. Garuccio

Quantum Zeno Processes, and Other Negative-Result Experiments 221
M. A. B. Whitaker

Occurrence of Decoherence in Simple Quantum Systems in a Heat Bath 227
J. Twamley

Complex Spectral Representations and Singular Eigenvalue Problem of Liouvillian in Quantum Scattering 231
T. Petrosky and I. Prigogine

Can the Environment-Induced Decoherence Solve the Measurement Problem? 239
K. Awaya

Macroscopic Quantum Tunneling in Ferromagnetic Particles 243
B. Barbara, L. Sampaio, A. Marchand, M. Uehara, C. Paulsen, J.-L. Tholence and D. Fruchart

Theoretical Study on Hadronic HBT Effect 245
M. Biyajima and N. Suzuki

Quantum Mechanics, Cantorian Space-Time and The Heisenberg Uncertainty Principle 249
M. S. El Naschie

Is it Possible to Know about Something Without Ever Interacting With It? 253
A. C. Elitzur and L. Vaidman

Indeterministic Cosmodynamics and The Einstein–Podolsky–Rosen Problem 257
L. P. Godenko and V. S. Mashkevich

S–Matrix via Path Integrals for Certain Noncentral Potentials 261
E. Gravador, M. V. Carpio-Bernido and C. C. Bernido

Dynamical Systems and Anholonomic Constraints 265
D. Hartley, R. W. Tucker and P. A. Tuckey

A New Theorem on Quantum Nonlocality 269
D. Home

Possible Observation of the Quantum Zeno Effect by Means of Neutron Spin-Flipping 273
S. Inagaki, M. Namiki and T. Tajiri

On the Statistical Interpretation of String Theories 277
Z. Z. Israilov

Berry's Phase and Euclidean Path Integral 279
T. Kashiwa, S. Nima and S. Sakoda

Tautology of Quantum Mechanics and Spacetime 283
J. Keller

Mechanisms of Wave-Function Collapse and Entropy of Detectors 287
T. Kobayashi

Review of Quantum Computation 291
S. Lloyd

Indeterministic Theory of the Universe 297
V. S. Mashkevich

Repeatable Measuring Processes for Continuous Observables 301
S. Matsumoto

Numerical Study of Gauge Fixing Ambiguity 305
A. Nakamura and M. Mizutani

Stochastic Quantization of Finite Temperature Systems 309
N. Nakazawa

The Constraints on Possible Deviations from Electrodynamics 313
V. Popov and Vasil'ev

Experimental Consequences of Stochastic Noncontextual Hidden Variable Theories 317
S. M. Roy and V. Singh

Quantal Chern-Simons Theory with External Potential and Variational Method for Multianyon Spectra 321
H. Sera and I. Ohba

A Test of the Schrödinger Equation 325
S. Takagi

Relativistic Generalization of Feynman's Proof of the Maxwell Equations 329
S. Tanimura

Anyons in a Four-Dimensional World with Gravity 333
C. E. Vayonakis

Sum-Over-Paths Extension of the Notion of Exhaustive Set of Mutually Exclusive Events (in the Example of Spacetime Probabilities) 337
N. Yamada and S. Takagi

III. *Gravitation and Cosmology*

Detection of Gravitational Waves: Problems and Prospects 341
V. B. Braginsky

Gravitational Waves and Numerical Relativity 355
T. Nakamura

Structure Formation and Many-Body Problem with a Special-Purpose Computer 375
D. Sugimoto

Quantum Statistical Processes in the Early Universe 391
B. L. Hu

Anthropic Principles in Cosmology 409
J. D. Barrow

Dynamics of Cosmological Phase Transitions: Metastability Revisited 429
M. Gleiser and E. W. Kolb

Are Cosmic Strings Consistent with COBE Data? 433
B. Allen

Statistical Distribution of Number-Density Fluctuations of Galaxies 439
J. Yokoyama and E. Gaztañaga

Conformal Time Slicing Condition in Three Dimensional Numerical Relativity 445
M. Shibata and T. Nakamura

Gravitational Waves in Expanding Universe with Cosmological Constant 449
H. Shinkai and K. Maeda

The Apparent Horizons of Einstein–Rosen Bridges in the Space-Time with a Cosmological Constant 453
K. Nakao, K. Yamamoto and K. Maeda

Regge Calculus Model of Bianchi IX Inflation 457
Y. Furihata and K. Sato

Cosmic No-Hair Theorem in Homogeneous Spacetimes 461
Y. Kitada and K. Maeda

Inflation with Steep Potentials 465
J. E. Lidsey

Bubbles in Extended Inflation and Multi-Production of Universes 469
N. Sakai and K. Maeda

Natural Double Inflation 473
F. Occhionero, M. Litterio, S. Capozziello and L. Amendola

Nonflat Perturbation Spectra from Double Inflation 477
V. Müller

Stochastic Non de Sitter Inflation 481
B. Spokoiny

Quantum to Classical Transition of Density Fluctuation in the Inflationary Model 487
Y. Nambu

Quantization of Gravitational Waves in Friedmann–Robertson–Walker Spaces and the Power Spectrum of the Primordial Gravitons in the Framework of Inflation Theories 491
M. Efroimsky

Classical Properties of Quantum Fluctuations in the Early Universe 507
A. L. Matacz

Numerical Simulations of Texture Evolution 511
M. Nagasawa and K. Sato

Inhomogeneity of Dark Matter and Luminous Objects Induced by Open Cosmic String 515
T. Hara, P. Mähönen and S. Miyoshi

Cosmic String Solution as the Dislocations 519
T. T. Fujishiro, M. J. Hayashi and S. Takeshita

Decay of Superstrings in the Early Universe and Origin of Primordial Heavy Elements 523
L. Tassie and T. Kajino

Cosmological Second-Order Density Perturbations Associated with Gravitational-Wave Perturbations 527
K. Tomita

Magnitude–Number Count Relation of Galaxies in an Inhomogeneous Universe 531
K. Watanabe

On Cosmic Time Variability of the Fine-Structure Constant 535
S. A. Levshakov

Retrogress to the Past of an Expanding Universe 539
H. Hayashi

On the Critical Indexes for the Jeans' Collisionless System 543
A. V. Ivanov

Gamma-Ray Bursts from Planet-Magnetosphere Systems around Neutron Stars 547
H. Hanami

Particle Creation near a Rotating Black Hole Immersed in Magnetic Fields 551
M. Yokosawa

Manipulating Phase of Digitized Photons: An Application to Radio Astronomy 555
T. Daishido, K. Asuma, K. Nishibori, J. Nakajima, E. Otobe, N. Watanabe, Y. Aramaki, H. Kobayashi, T. Saito, N. Tanaka and T. Hoshikawa

IV. *Quantum Gravity and Field Theories*

The No-Boundary Proposal and The Arrow of Time 559
S. W. Hawking

The Spacetime Approach to Quantum Mechanics 569
J. B. Hartle

$c = 1$ Two Dimensional Quantum Gravity 585
N. Sakai

Evaporating Black Holes in Quantum Gravity 601
A. Tomimatsu

Quantum-Gravity Path-Integrals on Simplicial Lattices 605
W. Beirl, E. Gerstenmayer and H. Markum

Fermion Sectors of Supersymmetric Diagnol Bianchi Type IX Cosmology 609
J. Bene and R. Graham

Topologically Constrained Path Integrals for Anyons, Strings and Rings 613
C. C. Bernido

Wick Rotation in Topology Change by Tunneling in (2+1)-Dimensional Einstein Gravity 617
A. Hosoya and S. Ding

BRS Symmetry in the Background-Field Method and Quantum Gravity 621
S. Ichinose

Massive Analogue of Ashtekar-CJD Action 625
K. Kamimura and T. Fukuyama

Quantum Fields in (2+1)-Dimensional Conical Space-Time 629
T. Maki and K. Shiraishi

Perturbation of Higher Genus Spatial Surface in (2+1)-Dimensional Gravity 633
T. Okamura and H. Ishihara

The Scale-Dependent Topology: The Effects of Small Handles on the Propagation of a Field 637
M. Seriu

False Vacuum Decay with Gravity: Negative Mode Problem 641
T. Tanaka and M. Sasaki

Resonance and Instability in a Cosmological Model 645
S. Tasaki, P. Nardone and I. Prigogine

Concluding Remarks 649
V. B. Braginsky

List of Participants 651
